

MEMORANDUM

Subject: Highway 20 Easement

To: Council

From: Sean Dunsmore, Manager Engineering

As part of the replacement of the Highway 20 bridge 200 metres west of the Welland Canal and in order to not disrupt traffic, the Region has designed a temporary road just to the south of the existing Highway 20. This temporary road is outside the existing road allowance for Highway 20 on the south side. The properties that the temporary road lands on are under private ownership by others one of which is the City of Thorold.

In order to allow this construction the Region of Niagara has requested a temporary easement over the property owned by the City. This easement will allow the conveyance of the traffic during construction but will be returned to the City in a like new condition.

As this work falls under the delegated authority to issue road occupancy permits staff is approving the temporary easement.

Respectfully submitted and signed by

Sean Dunsmore, P.Eng.
Manager Engineering
