The City of Thorold has issued a very recent public statement that the South Main Street Bridge Project is under the microscope to be "deferred". I am looking for a full explanation of what that means.

What specific aspects of the project are being recommended to be deferred and for how long?

The City's public statement, clearly states that "the deferral of Capital Works may result in further deterioration of the asset, and a more costly repair in the future."

So, in this specific instance, DELAY by the City of Thorold...

on a project of this size,

is NOT A POSITIVE MOVE...

compared to delaying other types of Municipal Capital Projects that will not necessarily be similarly-negatively-affected by...or subject to... further deterioration.
